

Ceragon Networks Q2 FY 2025 Earnings Call Script

August 6, 2025

Operator

Welcome to Ceragon Networks Second Quarter 2025 Earnings Conference Call. At this time, all participants are in a listen-only mode. Following management's prepared remarks, we will host a question-and-answer session.

If you wish to participate and ask a question on today's call you will need to click on the "raise your hand" icon within the zoom application on your desktop or mobile device.

As a reminder, this call is being recorded. It is now my pleasure to introduce your host, Rob Fink of FNK IR.

Rob Fink

Thank you, operator, and good morning, everyone. Hosting today's call is Doron Arazi, Ceragon's Chief Executive Officer and Ronen Stein, Chief Financial Officer.

23 Before we start, I would like to note that certain statements made on
24 this call, including projected financial information and other results and
25 the company's future initiatives, future events, business outlook,
26 development efforts and their potential outcome, anticipated progress
27 and plans, results and timelines and other financial and accounting-
28 related matters, constitute "forward-looking statements" within the
29 meaning of the Securities Act of 1933, as amended and the Securities
30 Exchange Act of 1934, as amended, and the safe-harbor provisions of the
31 Private Securities Litigation Reform Act of 1995.

32
33 Ceragon intends forward-looking terminology, such as "may", "plans",
34 "anticipates", "believes", "estimates", "targets", "expects", "intends",
35 "potential" or the negative of such terms, or other comparable
36 terminology, although not all forward-looking statements contain these
37 identifying words.

38
39 Such statements reflect current expectations, and assumptions of
40 Ceragon's management-- actual results may differ materially, as they are
41 subject to certain risks and uncertainties, which could cause actual
42 results to differ materially from those projected in our forward-looking
43 statements. These risks and uncertainties include, but are not limited to:

44 Company's forward-looking forecasts, with respect to which there is no
45 assurance that such forecasts will materialize; Company's ability to
46 future plan, business, marketing and product strategies on the
47 forecasted evolution of the market developments, such as market and
48 territory trends, future use cases, business concepts, technologies,
49 future demand, and necessary inventory levels; The effects of the
50 evolving nature of the war situation in Israel and the related evolving
51 regional conflicts; the effects of global economic trends, including
52 recession, rising inflation, rising interest rates, commodity price
53 increases and fluctuations, commodity shortages and exposure to
54 economic slowdown; risks associated with integration and deployment
55 of acquired businesses; risks associated with delays in the transition to
56 5G technologies and in the 5G rollout; risks relating to the concentration
57 of our business on a limited number of large mobile operators and the
58 fact that the significant weight of their ordering, compared to the overall
59 ordering by other customers, coupled with inconsistent ordering
60 patterns, could negatively affect us; risks resulting from the volatility in
61 our revenues, margins and working capital needs; disagreements with
62 tax authorities regarding tax positions that we have taken could result in
63 increased tax liabilities; the high volatility in the supply needs of our
64 customers, which from time to time lead to delivery issues and may lead
65 to us being unable to timely fulfil our customer commitments; and such

66 other risks, uncertainties and other factors that could affect our results
67 of operation, as further detailed in Ceragon's most recent Annual Report
68 on Form 20-F, as published on March 25, 2025, as well as other
69 documents that may be subsequently filed by Ceragon from time to time
70 with the Securities and Exchange Commission.

71
72 Forward-looking statements relate to the date initially made, and they
73 are not predictions of future events or results, and there can be no
74 assurance that they will prove to be accurate, and Ceragon undertakes
75 no obligation to update them.

76
77 Ceragon's public filings are available on the Securities and Exchange
78 Commission's website at www.sec.gov, and may also be obtained from
79 Ceragon's website at www.ceragon.com.

80
81 Also, today's call will include certain non-GAAP numbers. For a
82 reconciliation between GAAP and non-GAAP results, please see the table
83 attached to the press release that was issued earlier today which is
84 posted on the Investor Relations section of Ceragon's website.

85
86 With that I will now turn the call over to Doron – Doron the call is yours
87

88 **Doron Arazi**

89

90 Thank you, Rob, and good morning, everyone.

91

92 On the surface, Ceragon's second quarter revenue was below
93 expectations, but this is primarily tied to a single region - India - and is
94 largely being driven by one key customer that is navigating well-
95 publicized financial challenges. This has temporarily halted this
96 customer's order activity and limited near-term visibility as paths
97 forward are not yet established. Based on what we know today, we
98 expect that this will just be a timing issue, with market demand and our
99 share of the market essentially unchanged.

100

101 Beneath that headline, I believe the Ceragon story is far more
102 encouraging, reflecting the substantial improvements we have made in
103 our business over the past two years, as well as the benefits of continued
104 innovation in our solutions. We delivered \$0.03 in non-GAAP earnings
105 per share and maintained healthy operating margins, even in the face of
106 the disruption in India, a clear demonstration of the operational
107 strength, cost discipline, and resilience we've built into Ceragon.

108

At the same time our broader momentum continues to build. In fact, the second quarter was an encouraging period for Ceragon, with our differentiated technology demonstrating meaningful capabilities that we believe outpaces our competitors. These durable competitive advantages are actively positioning us for new opportunities and use cases that can drive incremental revenue and market share gains across multiple geographies. Customer needs and market trends are aligning with our technological roadmap. We're proving our value through field trials and proof-of-concept engagements, and this is beginning to fuel potential growth in our pipeline and bookings in real time.

This dynamic is especially evident in North America, where our recently introduced technologies are proving applicable to both service provider carriers and private network operators alike.

In fact, during the second quarter we secured a multi-million dollar project as a "preferred vendor" for a new major, tier-1 carrier in North America. This project leverages Siklu technology to introduce a new product, demonstrating our ability to deliver differentiated value through capabilities that, in our opinion, our competitors are far from introducing.

We are also expanding interest in such products across North America and other regions. While still early, we believe this new carrier engagement, as well as this new product could unlock substantial new business and contribute to incremental share gains with other service providers in one of the world's most strategic communications markets.

Second, we're cultivating significant increased interest in our Point to Multipoint solution. This technology has been demonstrated and validated in multiple proof of concept projects, both in North America and Europe, serving a wide range of use cases across private networks and CSP domains. These successful evaluations have enabled us to advance into more detailed discussions with potential customers and discuss early-stage commercial engagements.

The Point to Multipoint platform acquired through our Siklu transaction continues to prove its value – particularly in private network applications but increasingly with other customers as well. Given Siklu's financial position at the time of acquisition, we expected to address areas of underinvestment, and we acted quickly to stabilize and strengthen the product. We are now beginning to see the returns from that effort, with growing momentum and expanding business potential.

153 Importantly, the Point to Multipoint technology is particularly well suited
154 for smart city applications. As a chosen partner, we are currently
155 involved in a multi-year project in one of Latin America's largest cities
156 under a connectivity-as a-service model. Should this project mature to
157 its full extent, it could represent recurring annual revenue of \$7-8 million
158 for a minimum of 5 years.

159
160
161 In our traditional business, our IP-50EXP solution is gaining significant
162 traction as a leading traditional microwave solution alternative. The IP-
163 50EXP delivers millimeter wave-like capacity over traditional microwave
164 distances. This high-power product, combined with an auto align
165 antenna, enables customers to replace microwave deployments at a
166 significantly lower total cost of ownership and in many cases, even higher
167 bandwidth.

168
169 We are also participating in multiple RFPs for traditional backhauling
170 projects using our latest CX, EX and IP-50GP product families, in EMEA
171 and Latin America. These projects support network modernization
172 efforts aimed at increasing capacity. Our new products' exceptional price
173 performance ratio is increasing our chances to win business from
174 customers who we hadn't worked with in several years – demonstrating,

175 yet again, our ability to capture and recapture market share with our
176 industry-leading technology.

177
178 We are driving demand globally, but in Q2 North America remained a
179 standout. Excluding E2E contribution, both bookings and revenue in
180 North America exceeded \$20 million.

181
182 Balancing these exciting developments are short-term headwinds we're
183 experiencing in India—our largest market—and it's important to address
184 those directly.

185
186 Revenue from customers in India was \$24.8 million, a decrease of 30%
187 year-over-year. As I mentioned, one customer's well-publicized financial
188 challenges impacted a project we are involved in and this project stalled.
189 At this point, it is hard to predict whether and when it will resume,
190 although we believe the situation is a timing issue and expect a favorable
191 resolution in the future. Additionally, some other projects with other
192 Indian carriers are progressing at a slower pace than our original
193 expectations. However, we are bidding on a new opportunity in India
194 that could add significant incremental business for us in 2026 and
195 beyond. We continue to pursue more opportunities with new products,
196 including without limitations, leveraging Siklu's technology.

197

198 To summarize, our market share in India is expected to remain intact and
199 we still see this region as a long-term contributor to our business growth.

200

201 Zooming out, the variety of opportunities in front of Ceragon is the
202 strongest I can recall. While near-term visibility remains limited, we are
203 seeing positive and accelerating signals of success across our portfolio.
204 Our strategy is resonating, our commercial traction is expanding and our
205 technology is opening doors to further penetrate markets, enter new
206 segments and reach new customers.

207

208 Most importantly, the bottom-line results we reported today reflect the
209 meaningful improvements we have made to our business over the past
210 several years, enabling us to continue investments in our strategic
211 initiatives even at times when revenue is low. As a result, we remain
212 confident in our ability to translate future growth into stronger earnings
213 and sustained value creation.

214

215 I'd now like to turn the call over to Ronen Stein, our CFO, to discuss the
216 financial results in more detail. Ronen, over to you.

217

218 **Ronen Stein**

219

220 Thank you Doron, and good morning, everyone.

221

222 The second quarter was impacted by revenue headwinds in India, as
223 Doron described, with improving strength in North America and
224 continued progress against our strategy to create sustainable
225 profitability.

226

227 To help you understand the results, I will be referring primarily to non-
228 GAAP financials. For more information regarding our use of non-GAAP
229 financial measures, including reconciliations of these measures, we refer
230 investors to today's press release.

231

232 Let me now review the second quarter results.

233

234 **Revenue** for the second quarter was \$82.3 million, down 14.4% from
235 \$96.1 million in the second quarter of 2024. **North America** was the
236 strongest region in terms of revenue and contributed \$26.8 million. **India**
237 contributed \$24.8 million in Q2 2025 and was the second strongest
238 region.

239

We had two customers in the second quarter that contributed at least 10% of our revenue.

Gross profit in the second quarter on a non-GAAP basis was \$29.0 million, which was down 14.2% from \$33.8 million in Q2 2024. Our non-GAAP gross margin was 35.2%, unchanged from the prior year period. The sustained gross margin, even on lower revenue, was mainly attributable to our success in North America.

Moving on to operating expenses... I'd note that we have now consolidated E2E into our results, impacting total operating expenses.

Research and Development expenses in Q2 2025 on a non-GAAP basis were \$7.2 million, down from \$8.2 million in Q2 2024. As a percentage of revenue, R&D expenses on a non-GAAP basis were 8.8% in the second quarter versus 8.5% in the prior-year period.

Sales & Marketing expenses on a non-GAAP basis in the second quarter were \$11.1 million, up from \$11.0 million in Q2 2024. As a percentage of revenue, sales and marketing expenses on a non-GAAP basis were 13.5% in the second quarter as compared to 11.5% in the second quarter of 2024.

262

263 **General and Administrative** expenses on a non-GAAP basis for the
264 second quarter were \$5.9 million, as compared to \$1.4 million in Q2
265 2024. Keep in mind that our G&A last year included the impact of a \$4
266 million benefit related to an initial collection from a \$12 million debt
267 settlement agreement reached with a South American customer, for
268 which we accounted a credit-loss at the end of 2022. As a percentage of
269 revenue, G&A expenses on a non-GAAP basis were 7.2% in Q2 2025
270 versus 1.5% in the year-ago period.

271

272 **Operating income** on a non-GAAP basis for the second quarter was \$4.7
273 million versus operating income of \$13.1 million in Q2 2024. The absence
274 of the \$4 million credit loss recovery benefit I mentioned earlier,
275 combined with lower gross profit, was the primary factor for the decline
276 in operating income year-over-year.

277

278 **Financial and other expenses** on a non-GAAP basis in the second quarter
279 were \$1.7 million, an improvement from \$2.6 million in the prior year
280 period. The change was positively impacted by favorable exchange rate
281 changes and lower interest expenses.

282

Our **tax expenses** on a non-GAAP basis for the second quarter were \$0.6 million.

Non-GAAP Net Income for Q2 2025 was \$2.5 million, or \$0.03 per diluted share, versus non-GAAP net income of \$9.9 million, or \$0.11 per diluted share, in Q2 2024.

Moving over to our **balance sheet**:

Our **cash position** at June 30, 2025 was \$29.2 million, down from \$35.3 million at the end of 2024, primarily due to cash payments made in Q1 in connection with the acquisition of E2E amounting to \$6.6 million, net of acquired cash. Short term loans were \$20.5 million at the end of the second quarter, down from \$25.2 million at the end of 2024. Thus, our net cash position was approximately \$8.7 million, as opposed to \$10.1 million at December 31, 2024, again, largely due to the acquisition of E2E offset mainly by a positive free cash flow in Q2. We believe we have cash and facilities that are sufficient for our operations and working capital needs.

I'd note that we generated \$6.1 million in free cash flow, enabling us to reduce our debt in Q2 despite significant, short-term revenue

headwinds. This speaks to the progress we have made in our business model.

Inventory at the end of the second quarter was \$59.9 million, essentially unchanged from \$59.7 million at the end of 2024.

Our **trade receivables** at the end of the second quarter were \$124.1 million, versus \$149.6 million at the end of December 2024.

Our DSO now stands at 119 days.

Looking at our Statements of **Cash Flow**:

Net cash flow used **by operations and investing activities** in Q2 2025 was \$6.1 million.

I'd like to now turn the call back over to Doron to provide a summary and review our outlook:

Doron

326

327 Thanks, Ronen. Before we open the call for questions, I want to briefly
328 summarize the key takeaways and update our outlook.

329

330 Q2 highlighted the strength of the foundation we've built, as we
331 delivered non-GAAP profitability and generated free cash flow despite
332 the revenue headwinds, while advancing our strategic roadmap.

333

334 Traction across regions is growing and our technology is opening new
335 doors across both service provider and private network segments.

336

337 Our strategy has not changed, and challenges primarily in India do not
338 necessitate changes. We are on the right path, positioned to navigate
339 these timing issues while expanding our strategic position globally.

340

341 Turning now to our outlook—

342

343 Our visibility this quarter has been adversely impacted, primarily by
344 dynamics in India as discussed. As a result, we are not currently in a
345 position to reaffirm our prior guidance or provide an updated range. That
346 said, we believe this is a matter of timing.

347

348 In the meantime, this has placed greater weight on individual projects in
349 other regions—some of which were expected to contribute meaningfully
350 to our revenue and are currently delayed. Importantly, we strongly
351 believe we have not lost market share, in India or globally. In fact, we are
352 expanding our opportunity set, particularly in North America, primarily
353 due to technological leadership delivering stronger radio performance at
354 a lower total cost of ownership.

355

356 Looking ahead, we assume second-half revenue to be roughly in line with
357 the first half. Based on this assumption, we believe we can deliver non-
358 GAAP profit, and generate cash, while continuing to invest in our
359 strategic pillars: advanced wireless connectivity solutions, private
360 networks, and managed services.

361

362

363 With that, I'll now open the call for questions.
