Specialized Disclosure Report

CERAGON NETWORKS LTD.

(Exact name of registrant as specified in its charter)

ISRAEL	0- 30862	N/A
(State or other jurisdiction of incorporation or organization)	(Commission File Number)	(I.R.S. Employer Identification No.)

**24 Raoul Wallenberg,
Tel- Aviv 69719, Israel**
(Address of principal executive offices) (Zip Code)

Doron Arazi, Executive Vice President and Chief Financial Officer

Tel: +972-3-543-1660

(Name and telephone number, including area code, of person to contact in connection with this

Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

- Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2015.

Section 1 - Conflict Minerals Disclosure

Item 1.01 Conflict Minerals Disclosure and Report

Ceragon Networks Ltd. (the “Company”) has evaluated its current product lines and determined that certain products we manufacture or contract to manufacture may contain tin, tungsten, tantalum and/or gold, which are defined as “conflict minerals” (“3TG”). Accordingly, the Company is filing this disclosure along with a Conflict Minerals Report to disclose the measures we have taken to determine the origin of the conflict minerals used in our products.

Conflict Minerals Disclosure

A copy of The Company's Conflict Minerals Report is provided as Exhibit 1.01 hereto and is publicly available at <https://www.ceragon.com/about-us/ceragon/corporate-governance>

Section 2 – Exhibits

Exhibit 1.01 - Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form.

Signature

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Ceragon Networks Ltd.
(Registrant)

Dated June 1, 2016

Secretary

**CERAGON NETWORKS LTD.
Conflict Minerals Report
For The Year Ended December 31, 2015**

1. Overview

This report has been prepared by Ceragon Networks Ltd. (herein referred to as “Ceragon,” the “Company,” “we,” “us,” or “our”) pursuant to Rule 13p-1 (the Rule) promulgated under the Securities Exchange Act of 1934, as amended. According to the rule, if a SEC registrant, has reason to believe that any of the conflict minerals in its supply chain may have originated in the Democratic Republic of the Congo (“DRC”) or an adjoining country (collectively referred to as the “Covered Countries”), or if the registrant is unable to determine the country of origin of those conflict minerals, then the registrant must exercise due diligence on the conflict minerals’ source and chain of custody, and submit a Conflict Minerals Report that includes a description of those due diligence measures.

Our Solutions

Ceragon Networks Ltd. (NASDAQ: CRNT) is the #1 wireless hauling specialist. We help operators and other service providers worldwide increase operational efficiency and enhance end customers’ quality of experience with innovative wireless backhaul solutions. Our customers include wireless service providers, public safety organizations, government agencies and utility companies, which use our solutions to deliver 4G, mission-critical multimedia services and other applications at high reliability and speed. Ceragon’s unique multicore technology provides a highly reliable, high-capacity 4G wireless backhaul with minimal use of spectrum, power and other resources. It enables increased productivity, as well as simple and quick network modernization. We deliver a range of professional services that ensure efficient network rollout and optimization to achieve the highest value for our customers. Our solutions are deployed by more than 460 service providers, as well as hundreds of private network owners, in more than 130 countries.

Supply Chain

The products that we manufacture are highly complex, typically containing thousands of parts from many direct suppliers. We have relationships with a vast network of suppliers throughout the world and there are generally multiple tiers between the 3TG mines where tungsten, tantalum, tin and gold are extracted and Ceragon. Therefore, we must rely on our direct suppliers to work with their upstream suppliers in order that they may provide us with accurate information about the origin of 3TG in the components we purchase. Because of the complexity and size of our supply chain, we developed a risk- based approach that focused on our major suppliers. The suppliers identified pursuant to this risk- based approach received approximately 70% of payments we made for components and raw materials in 2015. We believe this was a reasonable approach because many of our contracts are long-term contracts and there is relatively little variation in our largest direct suppliers from year to year.

Reasonable Country of Origin Inquiry (RCOI)

We requested that all identified suppliers provide information to us regarding 3TG and smelters using the Conflict Minerals Reporting Template (CMRT) developed by the Conflict-Free Sourcing Initiative (CFSI). The Template was developed to facilitate disclosure and communication of information regarding smelters and refiners that provide material to a manufacturer’s supply chain.

We sent letters to our suppliers to explain the rule and to refer the suppliers to online training materials and instructions. We solicited information from suppliers using the Conflict Minerals Reporting Template (CMRT) and we received 72% responses. We reviewed the responses that we received and followed up on inconsistent, incomplete, and inaccurate responses, and we sent reminders to suppliers who did not respond to our requests for information. We compared the smelters and refiners identified in the surveys against the lists of facilities which have received a conflict free designation by the CFSP or other independent third party audit program. Ceragon does not directly source 3TGs. We source products and components from suppliers, which source materials from their sub-tier suppliers. Our supply chain is extensive and complex with many layers of suppliers positioned between ourselves and 3TG smelters and refiners. Due to our extended supply chain, we rely on suppliers to provide us with information concerning the sources and chains of custody of 3TGs necessary to the functionality or production of our products.

Currently, we do not have sufficient information from our suppliers to determine the country of origin of the conflict minerals used in our products or the facilities used to process those conflict minerals. Therefore, we cannot exclude the possibility that some of these conflict minerals may have originated in the Democratic Republic of the Congo or an adjoining country and are not from recycled or scrap sources.

Based on this result, Company conducted due diligence activities and details these in this Conflict Minerals Report.

Efforts to Determine Mine or Location of Origin

We have determined that requesting our suppliers to complete the most up-to-date CMRT represents our reasonable best efforts to determine the mines or locations of origin of 3TG in our supply chain.

Company's efforts to determine the origin of the Conflict Minerals with the greatest possible accuracy consisted of the due diligence measures described in this Conflict Minerals Report.

Smelters or Refiners and Country of Origin of 3TG

The vast majority of suppliers from which we requested information indicated in their response that the information provided was at a company level.

Despite receiving responses from manufacturers listing smelter or refiner names in their supply chain, the manufacturers were unable to accurately report which specific smelters were part of the supply chain applicable to the components that were sold to us in 2015.

Based on the information obtained through the due diligence process described above, we do not have sufficient information to determine the country of origin of the Conflict Minerals in our products.

2. Due Diligence

Design of Due Diligence

Our due diligence measures have been designed to conform, in all material respects, with the due diligence framework presented by The Organisation for Economic Co-operation and Development (OECD) in the publication OECD (2013) Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict- Affected and High- Risk Areas: Second Edition, OECD Publishing (OECD Guidance) and the related Supplements for gold and for tin, tantalum and tungsten.

Due Diligence Performed

1.

MANAGEMENT SYSTEMS

Conflict Minerals Policy

We have adopted a conflict minerals policy related to our sourcing of 3TG which is publicly available on our website at <https://www.ceragon.com/about-us/ceragon/corporate-governance> .

In addition, our ethical commitment is reflected not only in our conflict mineral policy, but also in our code of conduct, which outlines expected behaviors for all Company employees and our suppliers' Standards of Business Conduct which includes our specific approach regarding supplier's behavior such as: human rights, bribery, conflict of interests, insider trading etc.

Internal Team

We have established an internal team which includes an executive steering committee led by VP Procurement & Contract Manufactures and VP General Counsel of the Company which are responsible for implementing our Conflict Minerals compliance strategy.

Control systems

We do not typically have a direct relationship with 3TG smelters and refiners. We do, however, use the Conflict Free Sourcing Initiative freely available smelters lists to compare our smelters lists.

We utilize the CFSI reporting template to collect data and information from our suppliers in order to identify the 3TG origin in our supply chain. We also engage with a third party service provider to assist us with the identification of the smelters and refiners which process the minerals that may ultimately be assimilated into our products. .

We communicate the Ceragon's due diligence efforts to our customers upon request, and senior management on a periodic basis.

Maintain records

We generally retain records and relevant materials for 5 year period.

Supplier Engagement

As part of the process of engaging with the supply chain, Ceragon sent a notification to relevant suppliers in 2015 requesting from them to complete the CMRT. Ceragon also provides training materials and instructions for completing the CMRT. Many of our supplier purchase contracts have terms of three to five years or more, and we cannot unilaterally impose new contract terms or flow- down requirements that would otherwise compel these suppliers to support our due diligence efforts with respect to 3TG content. As we enter into new contracts or renew existing contracts, we will attempt to add a clause that requires suppliers to identify the source of 3TG.

Grievance Mechanism

We have internal processes in place which allow employees to express their concerns about possible improper or unethical business practices or violations of company policies, laws, or regulations. For external stakeholders and interested parties, they may contact us via our website to voice their concerns and/or request information.

2. IDENTIFY AND ASSESS RISK IN THE SUPPLY CHAIN

We surveyed direct suppliers that received approximately 70% of payments we made for components and raw materials in 2015.

Our suppliers' responses were provided using the CMRT. We reviewed the responses against criteria developed by our Internal Team to determine which required further engagement. The criteria included incomplete responses as well as inconsistencies within the data reported by those suppliers and we have worked with them in an effort to secure revised responses.

Smelters or refiners identified by Company's suppliers were compared against the list of facilities which have received a conflict free designation from the Conflict Free Smelters Program (CFSP).

We assess two primary risks in our supply chain relating to our suppliers:

(1) the risk of not receiving on time and accurate information from the supplier with respect to its sourcing of Conflict Minerals based on the suppliers' characteristics,

(2) the risk of not being able to replace a supplier, should we determine that the risk of the supplier sourcing Conflict Minerals from sources that contribute to human rights abuses, based on the level of our dependency on the suppliers' goods.

As a result of this assessment, we segmented our suppliers into three risk levels (high, medium and low) which allowed us to invest our communication and response validation efforts according to the supplier level of risk.

3. DESIGN AND IMPLEMENT A STRATEGY TO RESPOND TO RISKS

- Our senior management is briefed about our due diligence efforts on a regular basis.
- We adopted risk management plan for high risk suppliers and implemented follow up letters.
- We found no instance where it was necessary to implement risk mitigation efforts, temporarily suspend trade or disengage with a supplier.
- We engage in regular ongoing risk assessment through our suppliers' annual data submissions.

4. CARRY OUT INDEPENDENT THIRD PARTY AUDIT OF SUPPLY CHAIN DUE DILIGENCE AT IDENTIFIED POINTS IN THE SUPPLY CHAIN

We do not typically have a direct relationship with 3TG smelters and refiners and therefore do not perform or direct audits of these entities. We rely on independent industry initiatives such as the CFSI and other mechanisms which conduct validation audits for smelter and/or refiners.

5. REPORT ON SUPPLY CHAIN DUE DILIGENCE

This Conflict Minerals Report constitutes our annual report on our 3TG due diligence, is available on our website <https://www.ceragon.com/about-us/ceragon/investor-relations> and is filed with the SEC.

3. Results of assessments

Company sent 262 surveys and received 187 responses, amounting to a 71% response rate.

Currently, we do not have sufficient information from our suppliers to determine the complete list of country of origin of the conflict minerals used in our products or the facilities used to process those conflict minerals.

Based on the information provided by Company's suppliers and its own due diligence efforts with known smelters and refiners through December 31, 2015, Company believe that the facilities that may have been used to process the 3TG in Company products include the smelters and refiners listed in Annex I below.

Based on these due diligence efforts, Company does not have sufficient information to conclusively determine the countries of origin of the 3TG in its products or whether the 3TG in its products are from recycled or scrap sources. However, based on the information provided by Company's suppliers, smelters, and refiners, as well as from the CFSI and other sources, Company believes that the countries of origin of the 3TG contained in its products may include the countries listed in Annex II below, as well as recycled and scrap sources.

Please note that information gathered from Ceragon's suppliers is not on a continuous, real-time basis, and that, since the information comes from direct and secondary suppliers and independent third party audit programs, Ceragon can only provide reasonable (not absolute) assurance regarding the source and chain of custody of the necessary conflict minerals.

4. Ongoing Mitigation Efforts

We intend to take the following steps to improve the due diligence conducted to further mitigate the risk that the 3TG in our products finance or benefit armed groups in the Covered Countries:

- Attempt to include a conflict minerals flow-down clause in new or renewed supplier contracts.
- Continue to send follow up letters to high risk non responsive suppliers, and to suppliers with conflict minerals from the covered countries from non-certified smelters.
- Send surveys to suppliers earlier in the calendar year in order to allow suppliers more time to provide a complete response.
- Continue to validate supplier responses using information collected via independent conflict free smelter validation programs such as the Conflict-Free Sourcing Initiatives program.
- We are strengthening communications with suppliers in order to improve the number of suppliers that respond to the company's supply chain surveys, and continue to emphasize the importance of this initiative to Ceragon and to encourage their participation

Caution Concerning Forward- Looking Statements

Certain statements in this report may be "forward- looking" within the meaning of the Private Securities Litigation Reform Act of 1995. Words such as "expects," "intends," "plans," "projects," "believes," and "estimates," "targets," "anticipates," and similar expressions are used to identify these forward- looking statements. Examples of forward- looking statements include statements relating to our future plans, and

any other statement that does not directly relate to any historical or current fact. Forward- looking statements are based on our current expectations and assumptions, which may not prove to be accurate. These statements are not guarantees and are subject to risks, uncertainties and changes in circumstances that are difficult to predict. Actual outcomes and results may differ materially from these forward- looking statements. As a result, these statements speak only as of the date they are made and we undertake no obligation to update or revise any forward- looking statement, except as required by federal securities laws.
